Dear Customer,

This product you have purchased has been subjected to all tests and checks by us before it reaches you.

Even in this case, it is possible for some parts to be damaged during transportation. If you encounter such a situation, do not send the entire product back. Only ask for the damaged part. When requesting the required part, identify the part exactly by looking at the service card.

The missing part will be sent to you as quickly as possible.

Before starting the assembly, check all the parts and accessories included in the boxes according to the lists.

Start the assembly after determining that the parts and accessories are complete and intact.

Before starting the assembly, clean each part with a damp cloth.

If you have purchased more than one product, proceed to the next product after assembling a single product to avoid any confusion.

Never move the products by rubbing them. Carry the product by lifting and disassembling it with at least two people. For

long-distance transportation, be sure to transport the product in a package.

It is very easy to clean the surfaces of the furniture you have purchased. It is sufficient to wipe it with a damp and soapy cloth or other household cleaners.

Since furniture is affected by extreme heat, cold and humidity, do not put your furniture in direct contact with these factors. Do not use your

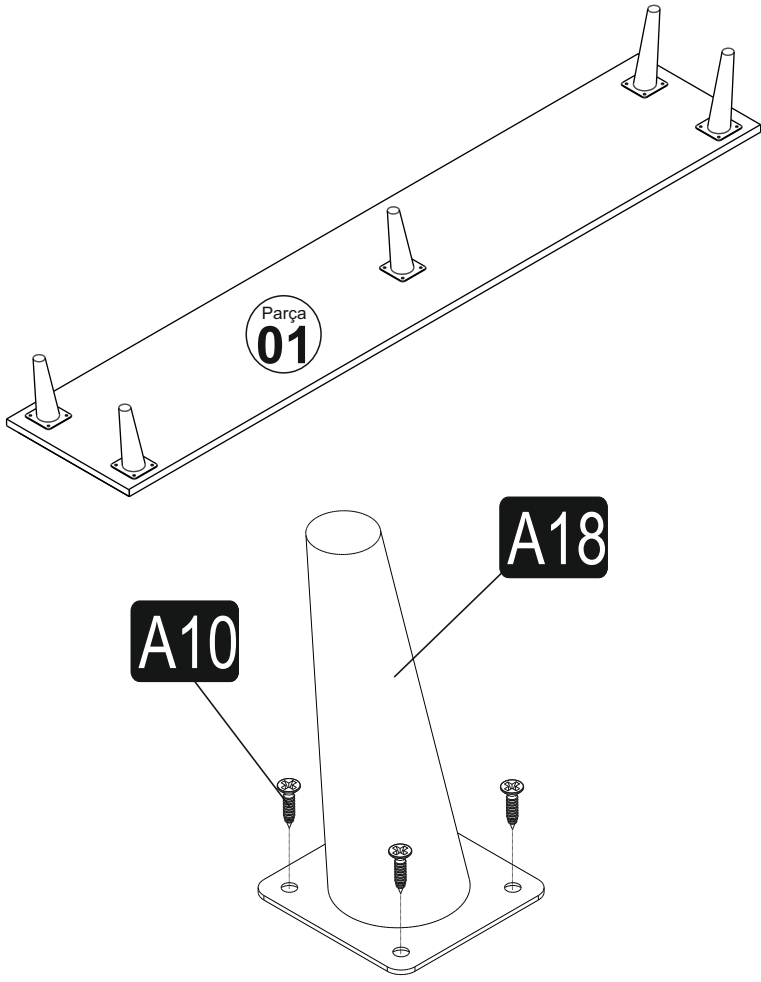

furniture for purposes other than its intended purpose.
